# CURRENT STATE OF CYBER-SECURITY in Small Organizations

Two-thirds of the SMB organizations surveyed, experienced at least one cybersecurity incident (i.e. System Compromise, Malware Incident, DDoS, Targeted Phishing Attack, Data Breach, etc.) over the past two years.

## RESULTS :

- Loss of Productivity
- Disruption of Business
- Disruption of IT System Availability
- Disruption of a Business Process

It's time SMB executives realize that Small Businesses represent an easy mark for Cyber Adversaries. Criminals target SMBs to extort money or steal valuable data, while nation states use small businesses as a beachhead for attacking connected partners. Hopefully, small businesses wake up to the dangers they face every second of every day.

# WHAT WE DO

The Best way to control is to measure. We help you carry a step by step approach to achieve Compliance and know the current state of your Infrastructure.

## WE AUDIT
